## Other scientific activities or responsibilities

I am very interested in scientific communication in general. I have collaborated to the "Fête de la science" several times. I have also participated to the creation of a specific activity for the "Rallye Mathématique" in 2016 and 2017. Furthermore I have been a member of the "Bureau des Doctorants de l'IMJ-PRG" which is a group of PhD students who are in charge of many organizational tasks such as office distribution or implementation and maintenance of the internet website <https://www.imj-prg.fr/doctorants/>. I have also initiated and co-hosted the PhD Students Welcoming Day on October 2016 where participants usually give short talks about their research topics, and I gave a talk at the February 2017 session. This event takes now place twice a year.

## Grants
